

Monitor gastrointestinal tolerance in children who have switched to an “enteral formula with food-derived ingredients”: A national, multicenter retrospective chart review (RICIMIX study)

Recently published data demonstrates that children who switched to an enteral formula with food-derived ingredients* had a significant improvement in gastrointestinal symptoms

In this retrospective study, children aged **1 to 17 years** (median age 6 years [IQR, 4-8])
Data was collected for those receiving Compleat® paediatric for at least 1 month

This multicenter retrospective study demonstrated improved feed tolerance in children after switching to an enteral formula with food-derived ingredients

O'Connor G, Watson M, Vann der Linde M, Bonner RS, Hopkins J, Saduera S. Monitor gastrointestinal tolerance in children who have switched to an "enteral formula with food-derived ingredients": A national, multicenter retrospective chart review (RICIMIX study). *NutrClin Pract.* 2021;1-6.

*Compleat® pediatric contains 13.8% food derived ingredients.
